

REPORT ABOUT JOB SHADOWING IN RZESZOW, POLAND

For our shadow experience, we were hosted by Primary School Number 10

With Bilingual Classes in Rzeszow, Poland, from 8th May 2023 to 12th May 2023.

During our first day of observation, we had the chance to meet the Principal ALBERT MURJAS, a very open minded person, that was so willing to receive and introduce us to the teachers that we had to observe.

He also was our personal guide in discovering the beautiful school he runs; we noticed that everything was so well organized and that the common areas were clean and equipped with so many facilities that encourage sociability. They have spacious and bright classrooms and a huge school canteen (in wich we had two delicious meals).

We spotted a well equipped gym, wich can easily act as a theater, comfortable teacher rooms and perfectly hygienic sanitary facilities. These features, all in all, gave us the idea of a scrupulous and efficent organization.

Then we visited all the green spaces outdoor, with many sport facilities and a lush nature with beautiful lawns and trees.

According to a schedule previously convened, we observed many theachers during their lessons and took part in many indoor and outdoor activities.

We also had a school trip observation at National Heritage (Cracow, Wieliczka Salt mine).

The entire experience was enriching, as we had the possibility of observing intresting lessons in various fields, such as Chemistry, English, Robotics. We took part in Eco workshops and planting trees activities but, most of all, it was so rewarding to interact with such motivated people that allowed us to share, even for a few days, their way of working and their friendship.

A heartfelt thank you to Albert and his team.

Francesco Rabe
