

REPORT ABOUT TENERIFE MOBILITY

During our period of mobility in Tenerife, we attended an interesting course on Enviromental Education: learning and acting for a better future.

We also had time to visit the beautiful isle of Tenerife, perfect scenary for those kind of topics.

As a result of our mobility activity we all gained a deeper understanding of the most dangerous threats of our ecosystem.

We learnt strategies to teach environmental respect, through the knowledge of notions and issues on ecology, biobiversity, pollution, climate change and sustainability.

Erasmus+mobility represents a great opportunity to broaden your mind and a powerfum mean to improve your language skills.

Absolutely to be recommended expecially to young people.
